

2022 CC Statistics Report

Contents

- ☐ CC data collection with CCScraper
- ☐ CC statistics for 2022
- ☐ CC Statistics for 5 years
- ☐ Conclusions

About me

- ❑ **José Manuel Pulido:**
- ❑ Lead Cybersecurity Consultant and Senior Cybersecurity Evaluator at jtsec
- ❑ Common Criteria expert
- ❑ CCToolbox developer
- ❑ More than 10 years of experience in cybersecurity technologies
- ❑ Speaker at several conferences including ICC20 and ICC21

About us

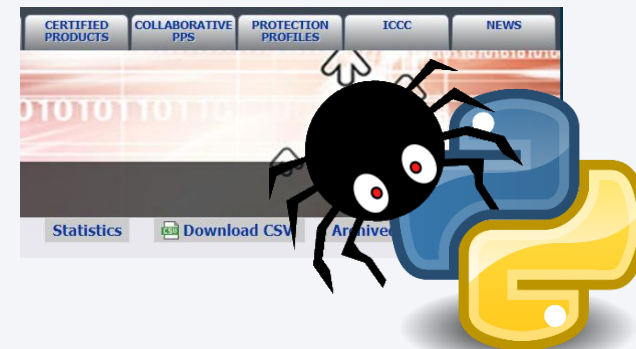

- ❑ Cybersecurity **evaluation** & consultancy **services**
- ❑ Common Criteria, LINCE and ETSI EN 303 645 accredited lab.
- ❑ Developers of the most powerful tool for Common Criteria, CCToolbox.
- ❑ **Involved in standardization** activities (ISO, CEN/CENELEC, ISCI WGs, ENISA CSA WGs, CCUF, CMUF, ERNCIP, ...)
- ❑ Members of the SCCG (Stakeholder Cybersecurity Certification Group)

CC data collection with CCScraper

What is CCScraper

- ❑ Web scraper written in Python. Created in 2018 by jtsec.
- ❑ CCScraper collects data about certified products from **commoncriteriaportal.org** and from the **websites** of the **Certification Bodies**.
- ❑ **Tons of interesting data** collected: date of certification, EAL, PP, Product Category, certification lab, etc. and even SFRs used or technical terms in the ST!
- ❑ Data is interpreted and organized / merged into a **list of unique certified products**. We generate the statistics from that data.
- ❑ We don't generate statistics of site certifications (yet).

CCScraper history

- ❑ **CCScraper v1.0** was first presented here in the ICCC in 2018.
 - ❑ Only data from **commoncriteriaportal.org** was collected.
- ❑ **CCScraper v2.0** was presented in ICCC 2019.
 - ❑ Main feature: add information from CB websites and merge into unique products
- ❑ **CCcraeper v2.1** was presented in ICCC 2020, with mainly efficiency improvements and email alerts.
- ❑ **CCScraper v2.2** was presented in ICCC 2021, with improvements in CB website parsers and detection of false duplicates.
- ❑ This year we present **CCScraper v2.3** with some upgrades for ICCC 2021.
 - ❑ Stability improvements parsing NIAP website.
 - ❑ German language support in parsing BSI website.
 - ❑ IPA scraper was completely rewritten due to changes in the website.

CCscraper reports

- ❑ With the statistics generated, we publish CC statistics reports in jtsec webpage, at least once per year.

- ❑ <https://www.jtsec.es/blog-entry/85/common-criteria-statistics-report-for-2020>

- ❑ <https://www.jtsec.es/blog-entry/106/common-criteria-statistics-report-for-2021>

CC Statistics for 2022

Statistics – 2022 (9 months)

196 products certified during 2022 (data until 30/09/2022)

Statistics – 2022 (9 months)

Top certifier schemes in 2022

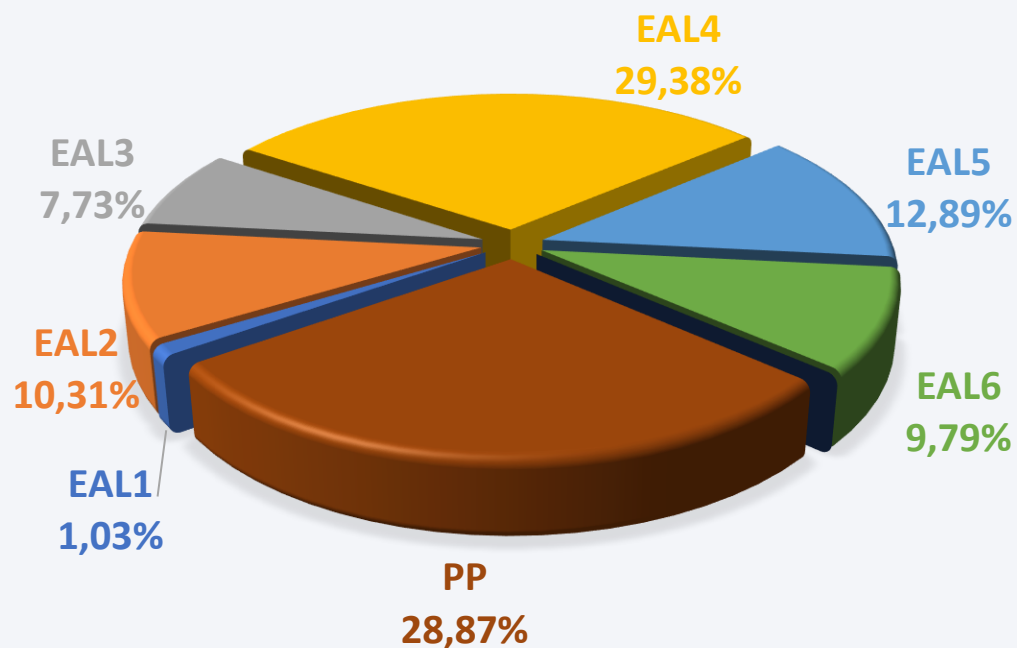

Statistics – 2022 (9 months)

- The top 2 schemes add up to 40% of the certifications!

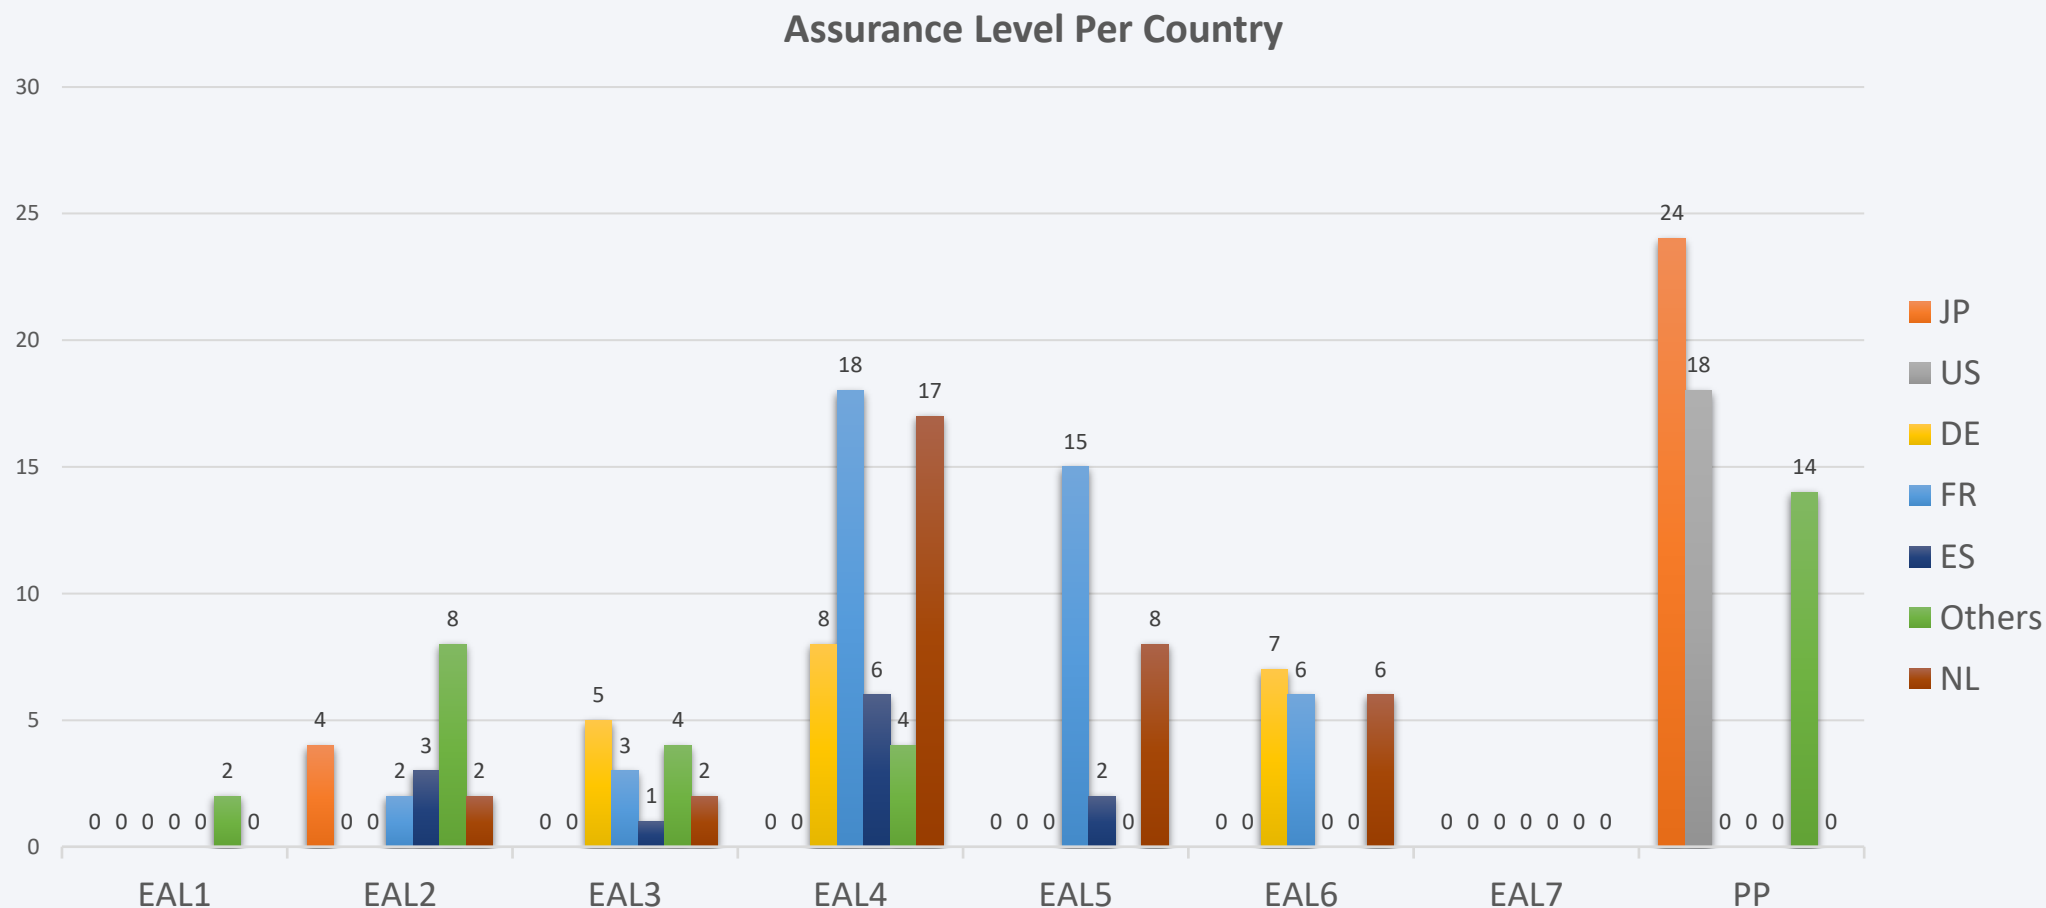

Statistics – 2022 (9 months)

 Certified products compliance in 2022

Statistics – 2022 (9 months)

Product assurance level per country during 2022

Statistics – 2022 (9 months)

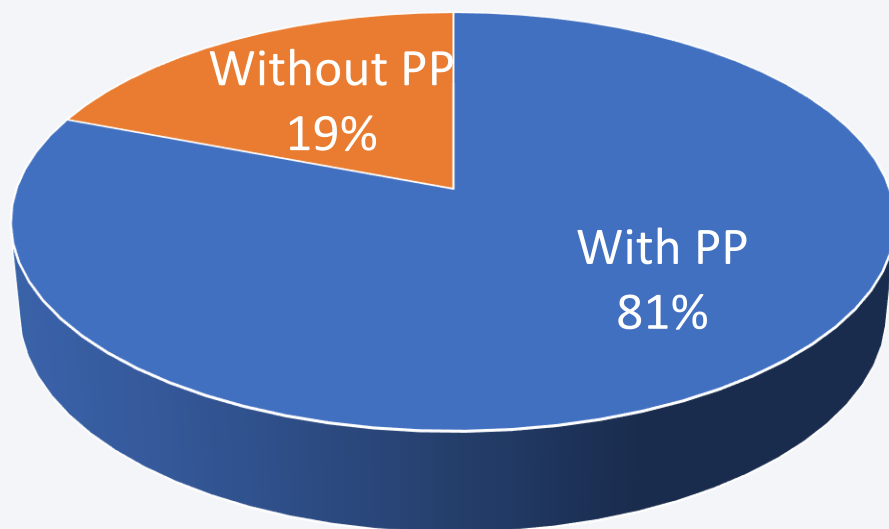

Top 10 Laboratories (2022)

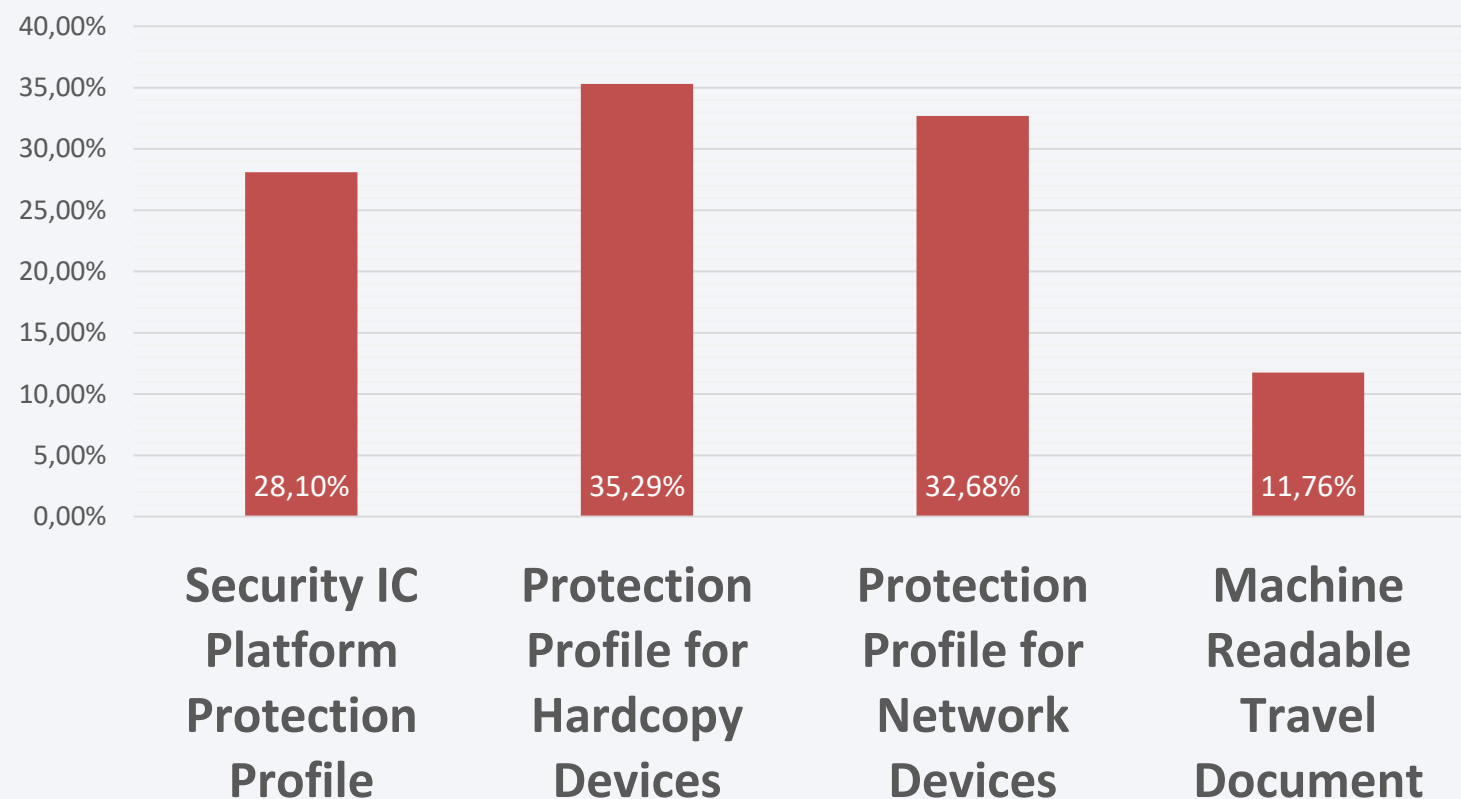

Statistics – 2022 (9 months)

Protection Profile certifications

Certifications with Protection Profiles in 2022

2022

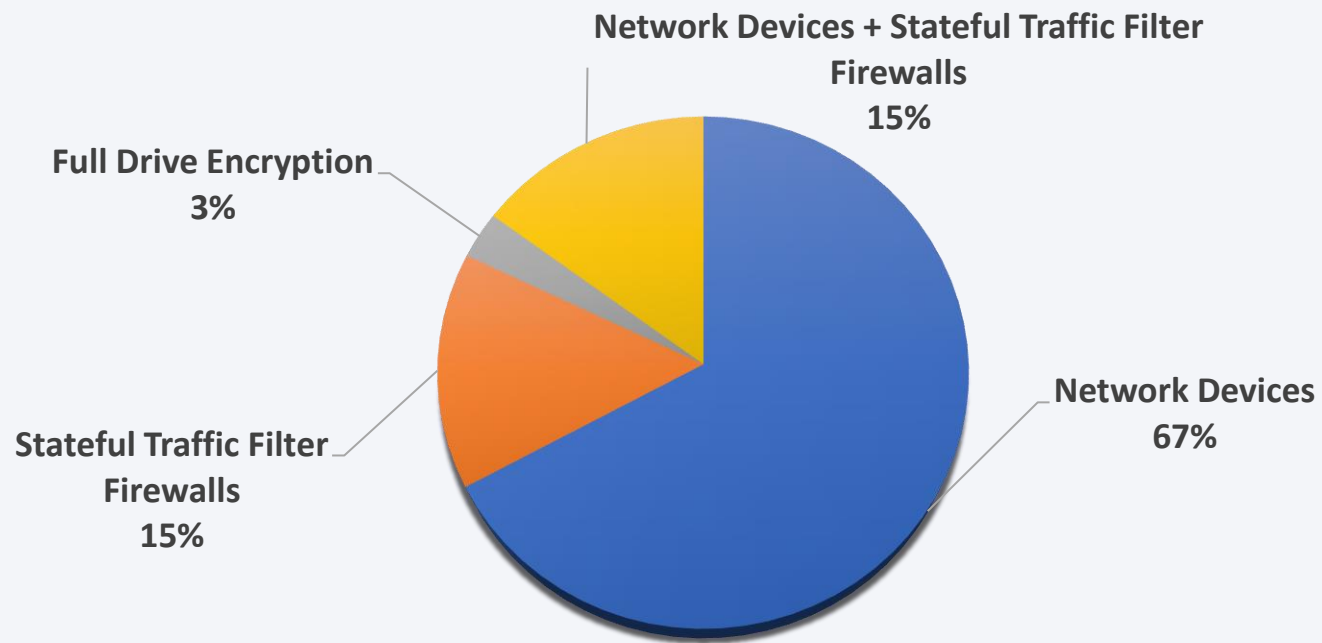

Statistics – 2022 (9 months)

□ PP and cPP compliant certifications in 2022

Collaborative PPs vs Non - Collaborative PPs

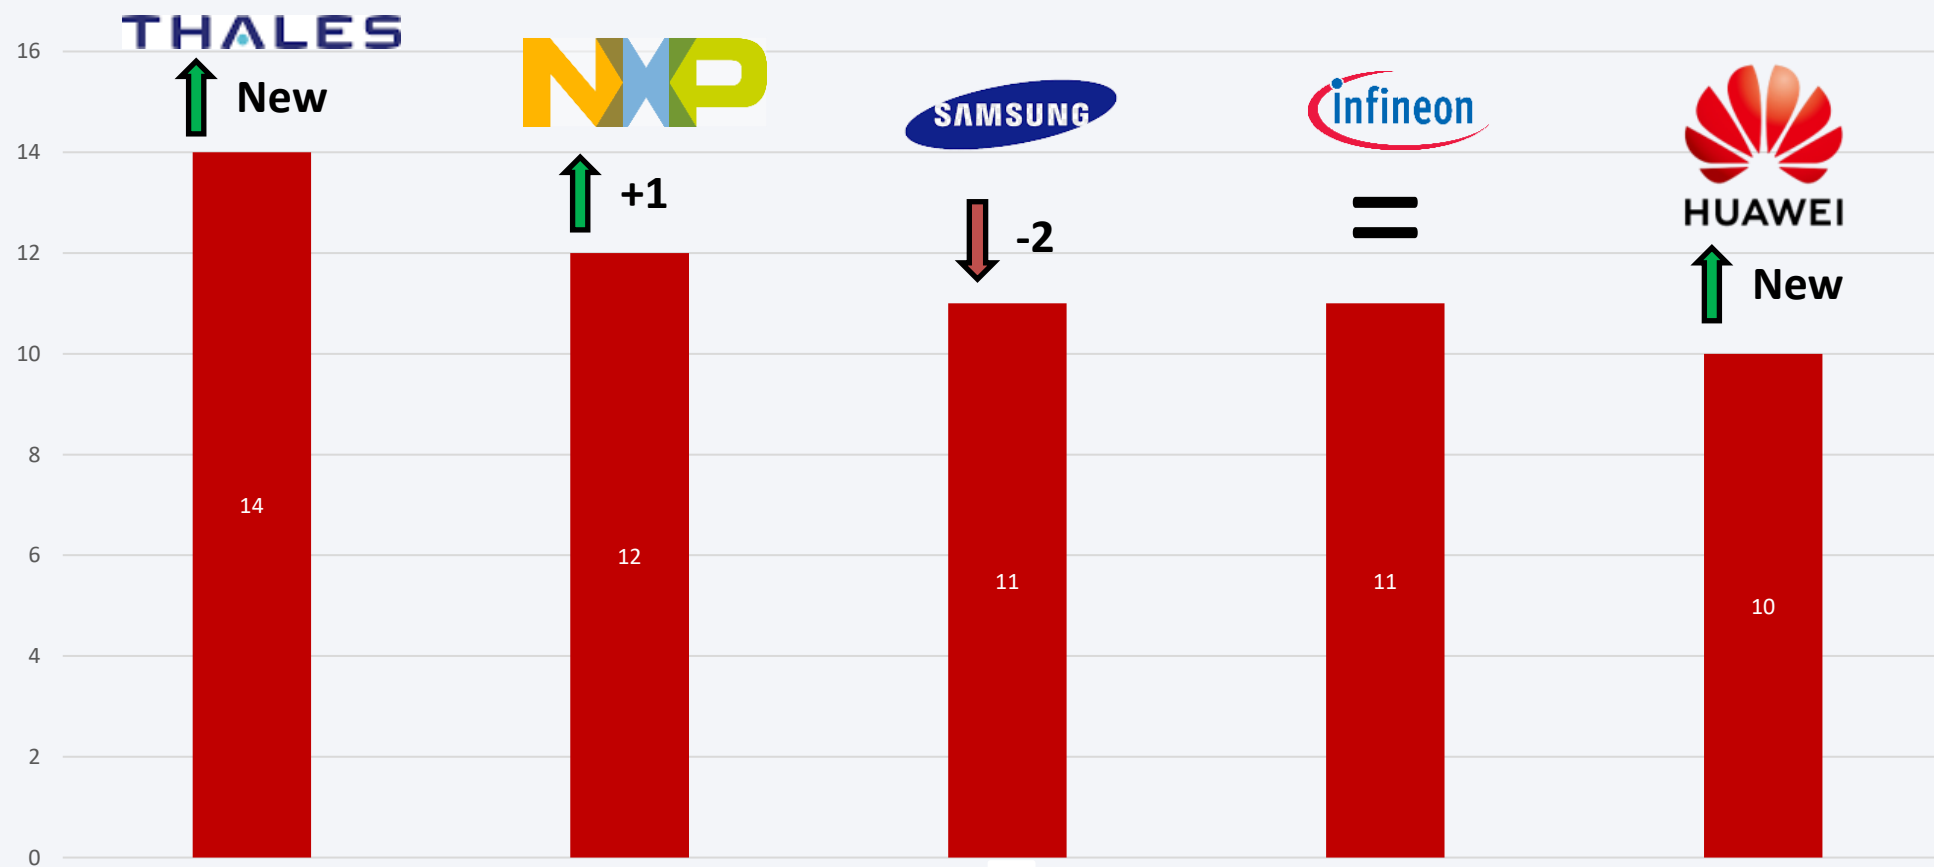

Certifications using CPPs

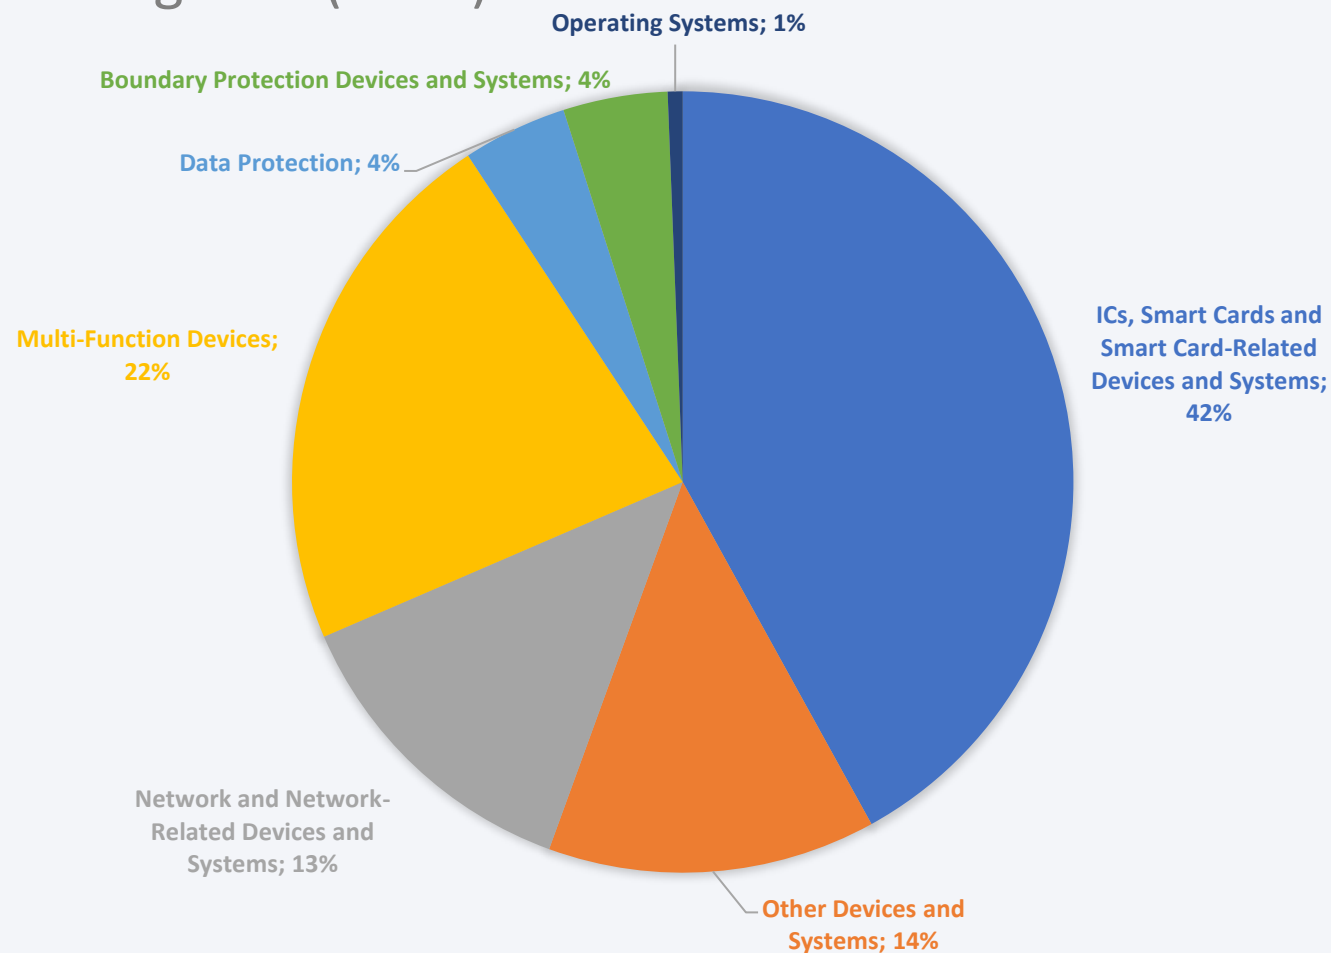

Statistics – 2022 (9 months)

Top 5 manufacturers of certified products (2022)

Statistics – 2022 (9 months)

Top product categories (2022) and their evolution

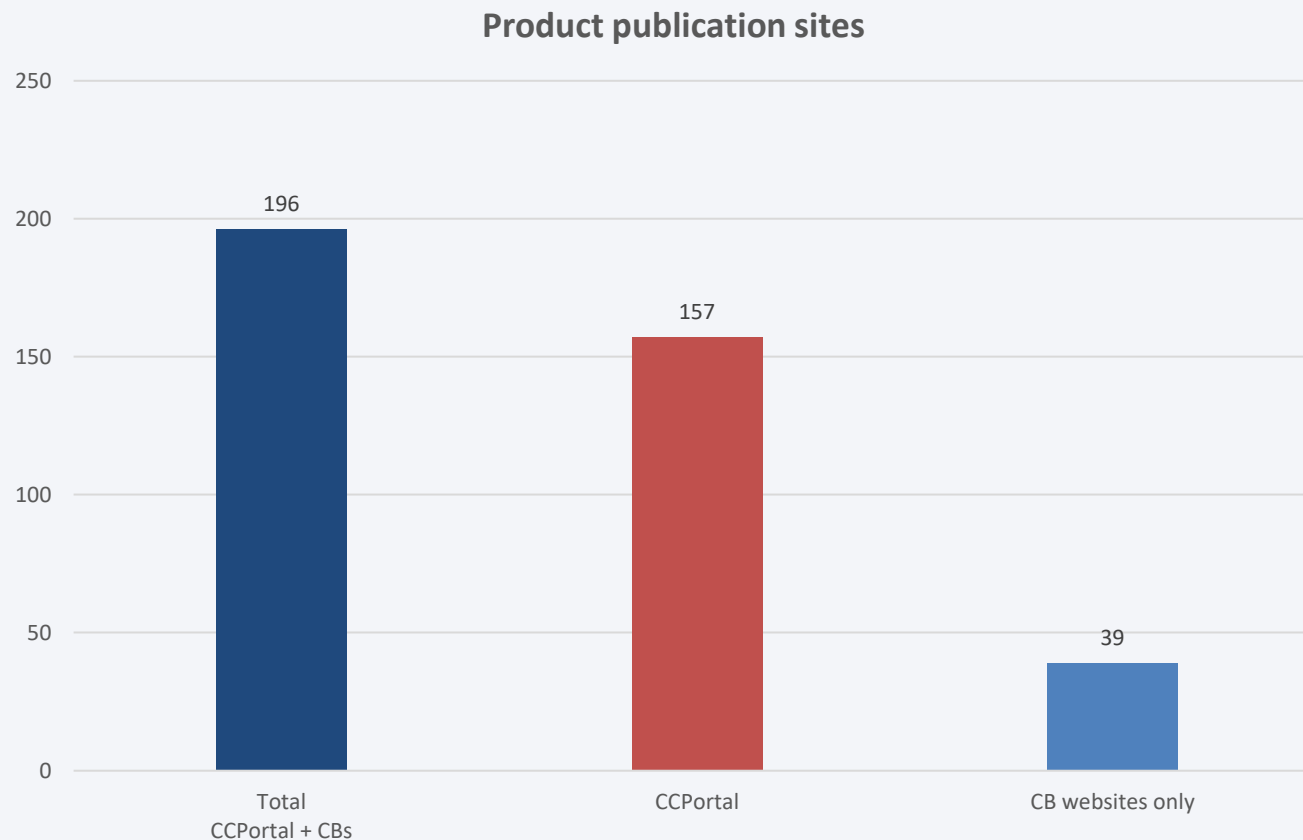

Statistics – Higher EAL manufacturers

Manufacturers and categories that obtained EAL6

Statistics – 2022 (9 months)

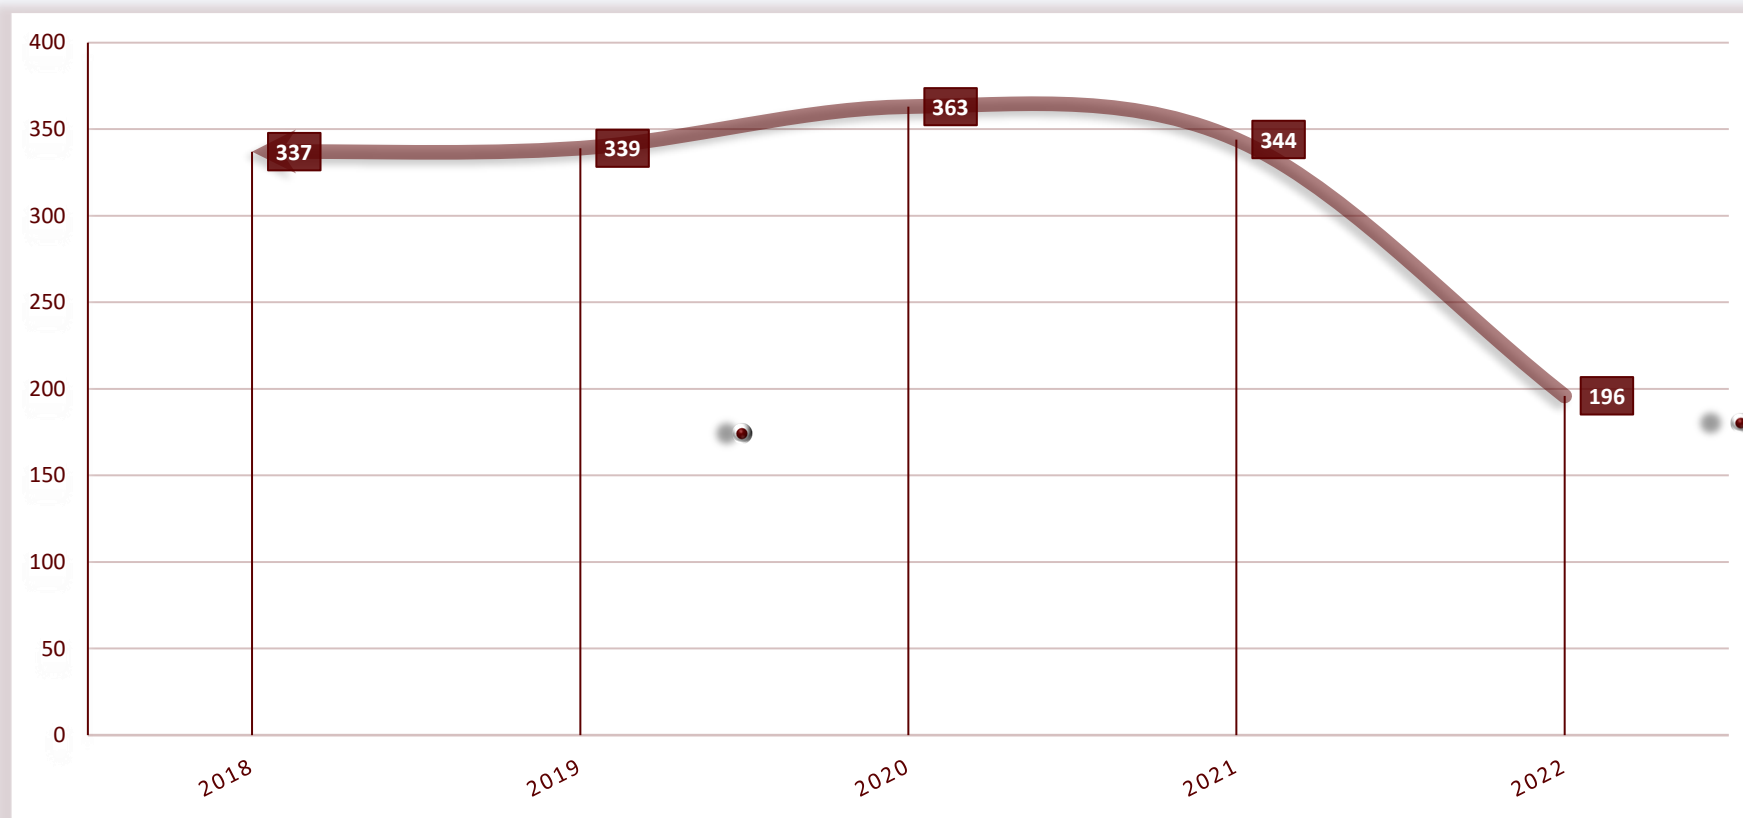

❑ Products uploaded to CC Portal vs products only in CB websites

CC Statistics for last 5 years

Statistics – 5 years trend

- Number of certifications in the last 5 years Will 2022 be the **worst year** of the last five?

Statistics – 5 years trend

☐ Compliance with EAL or PP of certified products (5 year)

Statistics – 5 year trend

 Certifications per country scheme in the last 5 years

Statistics – 5 year trend

□ Evolution of top 5 laboratories

Statistics – 5 year trend

Evolution of top product categories (five years)

Conclusions

Pessimistic global numbers and changes in top 10

- ❑ 2022 will probably end with **much lower numbers** than 2021 (286 by ICCC21, 344 at the end of the year)
- ❑ The **top certifying schemes**: US had the biggest drop; Other countries have slightly lower numbers than in 2021.
- ❑ Except for #1 lab, there have been **many variations within the top 10** of laboratories. 2 French labs are back in the top 3.
- ❑ Smartcards and Hardcopy devices were **the most certified categories**.
- ❑ Top #5 vendors are **almost smartcard and Security IC vendors**. Several ICs were certified using EAL6+.

Why has the number of certifications dropped?

- ❑ Raise of **other certifications** in Europe
 - ❑ National lightweight certifications are swifter;
 - ❑ Vendors waiting for EUCC to be a reality.
- ❑ The industry trend is cloud-based. Cloud-vendors demand certifications.
- ❑ The shadow of COVID pandemics: developments started in 2020/21 were certified on 2021/22; however, other products were never finished due to the pandemics.
- ❑ 2022 will be a negative year, after two remarkable ones.
